

202NL-LV Locking Ball Valve

3/4" COMPRESSION AND CAMPAK CONNECTIONS

The new Cambridge 202NL-LV Locking Ball Valve is designed to deter theft by integrating a unique locking mechanism. This locking mechanism requires a specific tool to unlock the ball valve. Without this tool, the ball valve cannot be turned. This new, innovative product comes in 3/4" x 3/4" size with Compression by Compression and Campak by Campak connections options.

Features:

- Conforms to AWWA C800 (ASTM B584 UNS C89833 for brass parts in contact with potable water)
- Conforms to ANSI/NSF 372 (Compliant with US Safe Drinking Water Act. PL 111-380)
- Conforms to ANSI/NSF Standard 61-8
- Body and nuts provide wrench flats for installation
- 300PSI working pressure
